Architectural Shapes™

W I N D O W S

**Style that lights
up a home —
affordably.**

*More than a
dozen standard
shapes*

*More than
150 stock sizes*

*Custom shapes,
sizes, and combinations*

CertainTeed ®
Quality made certain. Satisfaction guaranteed.™

Practical homes take shape with thermal efficiency, convenience, and dependability.

A circle window adds a unique accent in a small space.

And it's standard in all CertainTeed Architectural Shapes windows.

Forget maintenance.

CertainTeed Architectural Shapes windows are virtually maintenance-free. They will not chip, flake, rot, or corrode — even in ocean breezes or city air.

They never need scraping, painting, or puttying. A quick wash with soap and water will make them look like new. Every window is rigorously tested.

Trust CertainTeed.

CertainTeed windows are proven — with more than 18 million installed windows across the country.

They are backed by one of the industry's strongest warranties, and supported by a nationwide network of distributors for responsive service and support.

Beautiful homes take shape with personality, sunlight, and selection.

Geometric windows are focal points of home design. They create character that visitors respond to from curbside or inside. They enrich a home's architecture, and grace each room with sunlight.

That sounds expensive. And geometric windows have been. Until now. For significantly less than the price of wood geometric windows, CertainTeed Architectural Shapes win-

CertainTeed Architectural Shapes™ windows don't just add exceptional style to a home, they're exceptionally practical, too.

Save on energy costs.

CertainTeed Architectural Shapes windows are loaded with features that help make heating and cooling more efficient. With honeycomb frames and sashes, they insulate better than wood or aluminum,

while their fusion-welded corners and integral glazing seal out the weather up to six times better than industry standards require.

But their real advantage is CertainTeed's proprietary Thermaflex® Low "E" glass system — including argon gas and low-conductance spacer. It keeps homes cooler in summer, warmer in winter, and blocks 87% of damaging UV rays. All without distorting the view.

A feature window combination of a half-round muller to an oriel, and two custom-built trapezoids adds character to a smaller home.

dows create a look that's uniquely appealing.

Further, they deliver all the value in thermal efficiency, low maintenance, and durability that has made CertainTeed the leading vinyl windows in America.

Preserve tradition.

Match the original elliptical transom above a doorway perfectly. Replace extended arch windows without filling and patching.

Whatever the challenge, CertainTeed Architectural Shapes windows can be custom made for exact replacement, with styling and details that are faithful to traditional craftsmanship.

Create an original.

For a new home, remodeling project, or addition, choose from more than a dozen standard shapes in more than 150 stock sizes. Or design a custom feature window. Create an expressive combination. The possibilities are almost endless. And the results can be extraordinary.

Dramatic lighting. The height of this twin single-hung topped with a half-round creates a sense of light and space that makes a small room seem light and airy.

Custom built shapes. Any straight-sided shape, like these triangles, can be custom-built to complement a feature combination or fill a nook.

A refined look. The subtle curve of an extended arch can bestow a classic grace on an entire room.

A romantic accent. This gothic arch with a two-stem tracery grid pattern turns the room from routine to radiant. One-stem and two-stem patterns are available with flat grids.

Geometric Window Features and Options

Color choices. White or tan.

Grids between the glass. Color-coordinated, sculptured or flat grids are installed between the glass panes during manufacturing for easy glass cleaning.

ENERGY STAR® efficiency. With CertainTeed's proprietary ThermoReflect® glazing system with low-conductance spacer and insulating argon gas, Architectural Shapes™ windows meet ENERGY STAR® guidelines in all four U.S. climate zones.

Shapes and sizes to match your application.

CertainTeed Architectural Shapes windows are available in more than a dozen standard shapes and 150 standard sizes, with a nailing fin for use in new construction or remodeling.

Every standard shape can be custom made, without a nailing fin, for an exact fit in replacement applications.

Custom shapes and sizes are also available for both new construction and replacement. The potential is limitless.

Attractive options to add.

CertainTeed Architectural Shapes can be ordered with optional sculptured or flat grids between the glass. Standard grid patterns for windows are pictured to right. Visit our website at www.certainteed.com

Architectural Shapes™ windows with the Thermaflect® glazing system meet the ENERGY STAR® guidelines for thermal efficiency in all climate regions.

Choose from a dozen shapes with optional grids.

¹ Sculptured or flat grids between the glass available. ⁴ 48" width and smaller sizes have 3 grids.
² Flat grids between the glass available. ⁵ Available without J-Channel.
³ Grid pattern available in 56" widths and larger.

Create unique combinations. By combining CertainTeed Architectural Shapes windows from stock or custom with other CertainTeed windows, you can create a striking feature window to make any style of home more dramatic.

A classical homefront:
A fixed window topped with a half-round and flanked by double-hungs.

Contemporary drama:
A pattern of fixed windows crowned with custom angles.

A palatial window wall:
Tall fixed windows topped by quarter-rounds and a half-round.

A continuous arch:
An extended arch with elegant, curved custom flankers.
